SOCIETY GUT IN FORCE.

A GREAT NUMBER OF WELL-KNOWN PEOPLE AT THE COURSE.

That society regards the great Suburban as the most important and popular race of the year was probably never more conclusively proved than it was yesterday afternoon, when hundreds of men and women, conspicuous in the fashionable world, flocked in the heautiful track at Sheapshoad to.

The old-establishes, wholesale gravely house of Asp. & Company, of 311.316 Greenwich street, have opened new department to supply (aculies direct with Grocerie Processons Flour, Hames Incom, Fish, Butter, Win-Lupicos, Produce, etc., at accieftly wholesale prices, and as they self to greeness the acasemable quantities—savid them from 40 to 50 per cent. NEW-JERSEY ATHLETIC CLUB SAILORS. The New-Jersey Athletic Club's amateur sailors celebrated yesterday afternoon the opening day of the organization's yachting department. They had a jolly time, while several hundred men and women in holiday attire, who crowded the club's boathouses on the Bersen Point shore of Newark Bay, made merry as guests of the members with vocal and instrumental music and refreshments. The feature of the afternoon was the first race of the series for the silver challenge loving-cup recently presented to the club by Captain Joseph Elsworth, the veteran yachtsman of Bayonne. The course

The process by which foods are digested pre paratory to their absorption, is a complicated one, snarl and they have found that it consists of two important steps.

First, the mixing of the food with saliva in th mouth, and second, its subjection to the action of the gastric juice secreted by glands distributed

The action of the saliva is twofold. It softens the food and renders easy the action of the teeth in breaking it up into small particles, and second, it supplies a peculiar digestive principle called starchy food such as bread, potatoes, crackers, etc., into glucose, or starch sugar.

swallowed and enters the stomach, it is already partially digested, and the process is continued to completion as we have before stated, by the The gastric juice contains another and entirely

different digestive principle which supplements the action of the ptyalin of the saliva, and is very active in the digestion of all means as well as the albuminous constituents of vegetable foods. The

THE TEACHERS ANXIOUS.

OF THE ANNEXED DISTRICT.

CLERK OF THE BOARD TO MAKE A REPORT ON

A question that is disturbing the minds of some fifty school teachers in the recently Annexed Dis-trict is: What is going to become of the half-dozen schoolhouses in the Westchester County territory which have recently been added to New-York? The new territory includes Bronxville, West Farms, Washingtonville, Pelham and Williamsbridge, nearly sive corps of teachers. Inquiry was made at the Hall of the Board of Education yesterday as to the probable disposition of the teachers and schools now in the Annexed District. It is not at all likely that any radical change will be made in the corps of teachers of the annexed schools. The system of class graduation, of course, will be made to conform with that already in vogue in the New-York public the usual examinations exacted from all persons de-

siring to become teachers in the New-York public school system. These new schools will for the present come under the jurisdiction of the school trustees of the Twenty-fourth Ward, who are Elmer A. Allea, chatrman: Josepa d. Godwin, Joseph J. Marrin, Jon E. Eustie and T. E. Thomson.

With the exception of the two school buildings in Williamsbridge, most of these annexed schools are small township schools, having only one or two teachers and twenty-five or forty pupits. Instructions have been issued by Superintendent Jasper to the Cerk of the Board of Education, Arthur Mc-Muilin, to obtain as soon as possible the status of these schools, the number of pupils, the value of the buildings and grounds, and the number of teachers. In reply to the inquiries of several teachers who went to him last Saturday. Superintendent Jasper said that as soon as the requisite information was at hand, the plan to be pursued by the Board of Education in regard to these schools would be made known. These annexed schools will be treated just as the schools in the Twenty-third and Twenty-fourth wards were when they were annexed to the

fourth wards were when they were annexed to the city.

H. S. Fulier, Editor of "School," in his last issue says: "The annexation, in consequence, is an immediate gain to both teacher and pupil. The pupils of these schools, coming under the general school system of the city, are eligible for admission under examination to the Normal and City colleges. The school buildings come under the supervision of the Superintendent of School Buildings, and arrangements will probably be necessary in an, her year to provide means of transporting punis from a distance to the nearest schools. The Woodlawn school, which was completed a year ago, will probably be the gainer by the annexation of a number of pupils who, hitherto, though living near this school building, were beyond the city line, and could not attend it."
